Job Title: Analytics Manager

Location: Remote/Chennai, India

Experience: 6+ Years

Salary Range: 25-27 LPA

Notice Period: Immediate or 15 days or less

About the Role:
As an **Analytics Manager**, you will take ownership of managing a team and overseeing the successful delivery of analytics projects. You will lead efforts to transform business challenges into data-driven solutions using advanced analytics, machine learning, and big data technologies. The ideal candidate is passionate about data, excels in project management, and has proven experience in leading teams.

Key Responsibilities:

- Manage and mentor a team of analysts, ensuring successful project delivery within defined timelines.
- Collaborate with business stakeholders to understand their needs, translate them into analytical problems, and provide actionable insights.
- Apply advanced data mining, machine learning, and statistical modelling techniques to drive business outcomes.
- Lead projects involving the manipulation of massive datasets from diverse sources (RDBMS, Hadoop, etc.).
- Design and implement scalable solutions using big data tools (Hive, Spark) and programming languages (Java, Scala, Python, R).
- Deliver insights and recommendations to business users through data visualisation and reporting tools like Tableau or QlikView.
- Ensure best practices are followed in data management, analysis, and reporting.
- Hands-on with cloud platforms (GCP or equivalent) for implementing analytics solutions.
- Actively participate in team and client meetings to present findings, strategies, and next steps.

Qualifications:

- Postgraduate degree in Data Science, Computer Science, Statistics, Applied Mathematics, or equivalent fields.
- 6+ years of experience in predictive and prescriptive analytics.
- Hands-on experience with the Hadoop ecosystem (Hive, Spark, etc.) and familiarity with big data technologies.
- Proficient in programming languages (Java, Python, R, or Scala) for data analysis.
- Demonstrated experience managing teams and overseeing analytics project delivery.
- Strong knowledge of statistical techniques and machine learning algorithms.
- Excellent communication and problem-solving skills.

- Experience with cloud platforms like GCP or AWS is a plus.
- Certifications in Analytics, Big Data, or Cloud Technologies are a plus.

Benefits:

- Comprehensive medical insurance plan
- Paid holidays and vacation
- Opportunities for career growth in a dynamic, collaborative work environment
