Job Title: Business Analyst - In House (Automotive Industry)

Experience: 5+ years

Salary Range: 17 LPA

Notice Period: Immediate or 15 days or less

Location:Chennai, India

About the Role

The **Business Analyst** will collaborate with the Product Owner to gather, document, and curate business requirements in the form of Agile user stories. This individual plays a key role in aligning business requirements with technology and UX design, ensuring the solutions meet the client's needs.

Key Responsibilities:

- Gather and analyse business requirements from internal and external clients.
- Document requirements as Agile user stories to support Technology (Application Development & Data) and UX design.
- Ensure alignment of business needs with technical implementation and client expectations.
- Prepare program documentation, including process flows, use cases, and wireframes.
- Plan and synchronise the workflow of user stories across User Experience, Creative, Development, and QA teams.
- Coordinate client reviews and gain approval for requirement specifications.
- Lead client-facing activities such as requirements gathering sessions, review meetings, and user acceptance testing.
- Support quality assurance by ensuring requirement-to-test case traceability and reviewing test scenarios.
- Serve as a second-tier support for triaging customer inquiries and logging defects.
- Participate in new business opportunity meetings and presentations as needed.

Key Qualifications:

- 5+ years of experience in a business analysis role, preferably in a customer-facing, consultative role within a technology consulting firm.
- Strong domain expertise in the **Automotive industry**.
- Experience with Agile Development Methodology (**minimum 3 years**).
- High proficiency in SQL (preferably Postgresql) for data review and analysis.
- Preferred experience with Google Cloud implementations.

- Bachelor's degree in business, economics, or a technology-related field.
- Excellent communication and documentation skills.
- Proficient in Microsoft Word, Excel, PowerPoint, and Visio.
